Jim

EPA has reviewed the LWG's April 14, 2010 letter and table detailing the LWG response and notes on EPA verbal clarifications from our follow-up meeting on CDF performance standards. EPA generally agrees with the overall approach described in the LWGs letter and the LWG's responses as a means to move forward with the FS. We are providing some additional comments on the table to further clarify our position on some of the comments/notes, and are asking the LWG to confirm that it will address the performance standards as directed.

Please let us know if you have any questions regarding our letter or comments.

thanks  
Chip
